

PLACEHOLDER — REPLACE THIS FILE

assets/resume.pdf

This is a stand-in so the résumé link on the site is not broken.

Drop your real CV in at assets/resume.pdf — same filename, nothing else needs to change. The link appears in two places:

- Sheet 01, beside “See the work” and “Start something”
- Sheet 06, in the “Elsewhere” list

If you would rather link a hosted PDF (Google Drive, a /cv route on your own domain), change the two href attributes instead and delete this file.

Generated as a placeholder. Not a real résumé.
